TRAINING BULLETIN

Lightweight Wood Construction

This course introduces the student to the special characteristics and considerations of Lightweight Wood Construction. Topics such as manufacturing methods, component awareness, fire performance, and strategies & tactics pertaining to fires involving lightweight wood construction will be examined. Primary emphasis is on improving fire personnel's ability to recognize the presence of lightweight wood construction and the hazards related with it. Course material enables the student to recognize the dangers, operate safely and better predict the overall reaction of a building during fire conditions. The course includes three student activities.

The course consists of 12 hours of training presented on as follows:

LOCATION: Whitesboro

DATES: February 7, 12, 26, 28

Class starts at 6:30 pm on Weeknights - Daytime classes begin at 9:00 am

Pre-registration is required.
