

Training Announcement

Live Fire Foam Operations

DATE: 7/24/17 (classroom), 7/25/17 & 7/26/17 (hands on live fire)

TIME: Night Class 18:30 hrs (limited to 24 students)

LOCATION: NYS Preparedness Training Center - Oriskany

This will be a hands on course with multiple days of outdoor activities working with apparatus, handlines, calculations and foam eductors to gain experience with hands on foam application under live fire conditions.

This course provides practical training for mitigating spills and fires involving crude oil, ethanol and other ignitable liquids. Topics covered include: overview of common ignitable liquids; use of class B foam, with emphasis on alcohol resistant foam concentrates; foam nozzles and proportioning equipment; and determining foam needs for various scenarios. There are also hands on practical activities involving vapor suppression with finished foam, confining spills, and live fire extinguishment. During live fire evolutions, foam handlines will be set up and employed for a leaking and burning tank truck. Full structural turnout gear, SCBA with spare cylinder, and a signed Training Authorization Letter are required for this course for all students.

Designed for: All emergency response personnel

Prerequisite: Fire Fighter I or equivalent and Hazmat First Responder Operations. Signed Training Authorization Letter required

Registration: Oneida County Fire Coordinators Office
