

**Herkimer County
2001 Teen Assessment Project (TAP)
Survey Report Addendum:
Showing Total Response Pattern for 1997 and 2001
Breakdown of 2001 TAP Data
By Gender and by Grade**

This is an Addendum to the Herkimer County 2001 Teen Assessment Project (TAP) Report: Tapping into Teen Concerns, Perceptions and Behaviors issued in October 2001. In this Addendum, there is a table for each question of the Herkimer County 2001 TAP Survey. Each table shows the following information:

- 1st Column: % of total students that choose each possible response in the Herkimer County 1997 TAP Survey*
- 2nd Column: % of total students that choose each possible response in the Herkimer County 2001 TAP Survey*
- 3rd & 4th Columns: % of male and female students, respectively, that choose each possible response in the Herkimer County 2001 TAP Survey
- 5th, 6th & 7th Columns: % of 7th, 9th & 11th grade students, respectively, that choose each possible response in the Herkimer County 2001 TAP Survey

* Note: The Herkimer County 2001 TAP Survey contains 154 questions, of those, 82 are questions also found in the 1997 TAP Survey. So, if there are no percentages in the first column, it means that the question was not in the 1997 TAP Survey.

At the bottom of each column, by N=, the total number of respondents for that category is shown.

The information in this Addendum can be particularly useful to school district officials. They can compare the response rate for their students with those of the County as a whole. It is also useful for others in the community for research purposes, program planning and grant writing.
