# **JAIL RADIO SYSTEM**

## **RFP No. 2018-235**

### **I. RFP OVERVIEW: NEW JAIL RADIO SYSTEM**

The Oneida County Emergency Services Department, working with the Oneida County Sheriff's Office, is looking to replace the existing analog voice radio system at the jail at the Oneida County Correctional Facility, located in Oriskany, New York, with a new digital voice and data system.

The existing analog 800 Mhz GE EDACS trunking system will be replaced with a Motorola Digital TDMA Capacity Plus Trunking system. It will be a 3 repeater 6 time slot trunking system that will support over 100 subscribers for voice, indoor and outdoor location, emergency alarm notification, event logging, and voice recording.

The system will be able to provide both group and private calls, text messaging, and emergency alarms with indoor and outdoor location displayed in central dispatch. The voice system will also connect to the County's new Astro 25 VHF Trunking system.

The radio system shall provide 99% voice coverage.

### **II. SYSTEM OPERATION OVERVIEW**

The main voice channel will consist of day to day communications. Additional groups i.e.; SERT teams and supervisor talkgroups are to be determined. Private calls also to be determined.

The emergency button (orange) will be pushed in the event of an emergency and icon (red) will appear on the map monitor with the location of the emergency. This will prompt additional icons (yellow) to populate the map showing dedicated responders. The voice communications will be provided by a control station located in Central. This control station also provides a redundant emergency display, should the map location fail.

The location of the radio is determined by nearest Bluetooth beacon to the radio. The more beacons the more precise the location. The radio's internal Bluetooth communicates with the beacon to determine location. There is no wired connection to this system. All communications occur between the beacon and the radio and the radio to the repeater. The repeater is connected via ethernet to the server. There is no connectivity to the county network except the WEB Clients that communicate via a browser.

See attached Statement of Work for additional details.

### **III. RADIO INFRASTRUCTURE AND SUBSCRIBER RADIOS**

The main Radio infrastructure will consist of the following (see attached Jail Radio System Pricing Page):

- 3 Motorola MTR3000 repeaters
- 1 HP Procurve 2530 switch
- 1 HP MSR2003 Router
- 1-Spare MTR3000 repeater

The Radio infrastructure will be installed in an existing open rack in the equipment shelter behind the Jail. All antenna equipment and combining equipment will be reused. All of the existing GE/MACOM/Harris equipment must be removed by the vendor.

The Radio Subscribers will be the following (see attached Jail Radio System Pricing Page for quantities and accessories):

Vendor will supply and install 2 control stations and antennas in the radio equipment shelter. It will consist of 1 XPR5580e control station with a Trbonet Swift agent gateway programmed for Jail Trunking system and 1 APX1500 control station programmed for the Oneida County Trunking system. A third control station may be required for the County Conventional Law channel.
