- I understand that should any part of a project site be physically altered, funds be committed, or funds be expended prior to receiving the appropriate environmental clearances, that the site will not be eligible for CDBG funding and the Oneida County may be responsible for any costs incurred except under the following circumstance: in the case of Exempt activities, concurrence from the NYS Office of Community Renewal that the particular action is Exempt prior to any physical alterations unless that action is taken to address an emergency situation in which case concurrence must be obtained no later than the first regular business day following such an event,

National Wild and Scenic River System in the U.S.

Wild and Scenic Rivers

There are 226 national wild and scenic rivers in 40 States and the Commonwealth of Puerto Rico, totaling more than 13,412 miles (as of April 2019). This is a little more than one-quarter of one percent of the nation's rivers.

The United States Forest Service, National Park Service, Bureau of Land Management, and the United States Fish and Wildlife are the four primary federal agencies with responsibility for the National Wild and Scenic Rivers System. These agencies are responsible for protecting and enhancing the river values for the components located within their management boundaries, whether designated by Congress, or by the Secretary of Interior at the request of a governor. Many rivers include private and tribal lands within the boundaries of the designated river area.
