## Executive Summary:

Oneida County currently maintains all of its tax maps in Environment System Research Institute’s (“Esri”) ArcMap version 10.6. ArcMap support is sunsetting in the near future and the need to migrate to Esri’s ArcGIS Pro has arrived. This process will require the conversion of 1 index map document and 46 municipal map documents into 26 Town, 16 Village, 3 City, ArcGIS Pro projects. The current ArcMap map document format is structured using ‘data driven pages’ for the tax map layouts, providing 1,284 tax map sheets that cover the entirety of the County. The tax parcel data exists in individual municipal file geodatabases containing the feature classes, feature data sets, tables, and annotation layers. Each tax sheet is created/maintained using a template layout and the data driven pages functionality in ArcMap. The new ArcGIS Pro project structure must use these geodatabases and re-create these 1,284 tax map sheets in similar fashion using ‘Map Series’ structure or functional equivalent. Each Esri municipal project shall contain the layout structure(s) for the tax map series in that municipality.

Oneida County also has the need to update a backlog of tax parcel maintenance that has occurred due to staff shortages years ago; currently, all of 2022 and 2023 will need to be addressed, and all splits and merges for that time period will need to be completed as the migration progresses. Additionally, to keep the mapping current, any splits or merge requests that come in as the migration is occurring, roughly 30 per month, must also be addressed by the vendor. The goal at the end of the project is to have migrated all projects to ArcGIS Pro and have all tax mapping current.

## Background

Within the County there are three cities, twenty-six towns and sixteen villages. The mapping for those municipal entities is broken down as follows:

## Evaluation Criteria

Proposals will be evaluated, and, at Oneida County’s discretion, an award made to the GIS mapping firm that demonstrates the best ability to meet the overall goals of the project, with particular emphasis on the ability to fulfill the scope of work in the most timely and efficient manner. The County will initially assess the qualifications of each firm submitting a proposal and evaluate the proposal according to the following criteria:

- Total Project Cost – Lump Sum
- Capability/Experience – Has the firm worked on similar projects?
- Staffing – Does the firm propose to use an adequate number of staff?
- Support Record – Provide customer references.
- Understanding of the project – Does the firm understand the scope and logistics needed to complete the project?

The County may select one or more of the proposing firms for interviews. The County may also forego the interview process if it deems that an interview process is not warranted.

ArcGIS Pro projects must include the ability to print a standard tax map at regulation size. PDF output of the tax maps must also be available and a PDF of each tax sheet shall be delivered upon completion.

The tax parcel data shall exist in individual municipal file geodatabases containing the feature classes, feature data sets, tables, and annotation layers. The new ArcGIS Pro project structure must re-create the existing 1,284 tax map sheets.
5. Expected digital materials from Oneida County – Oneida County will provide all split and merge requests every two weeks. Merge requests will come in the form of emails and split requests will come in the form of NYS RP 5217s which will be placed on our ftp site. Oneida County will also provide all the ArcMap projects and spatial data (geodatabases) currently used to maintain our tax maps.
