## **Raccoon Tests Positive for Rabies in Town of Marcy** *Oneida County Health Department Urges Residents to Recognize Signs of Rabies*

A raccoon has tested positive for rabies in the Town of Marcy. The raccoon was sent to the New York State Department of Health Wadsworth Center for testing on September 8, 2020 and positive results reported the following day. One person and two dogs had exposure to the raccoon. The person is receiving post exposure prophylaxis. The dogs were up to date on vaccinations and will get a booster.

Signs of rabies include:

- Animal acting strangely
- Animal acting mad
- Animal acting shy – the animal may get unusually close
- Drooling or foaming from the mouth

If you see an animal, wild or stray, with these signs, do not approach it and stay away. If any animal is acting strangely, call your local animal control officer for help. Residents are strongly urged to not approach animals that they do not know.

For the safety of pets and the convenience of county residents, the Oneida County Health Department offers Rabies Vaccination Clinics throughout the year in various community locations.

**PLEASE NOTE: Our remaining rabies vaccination clinic scheduled in Annsville is at full capacity and there are no appointments available. Walk-ins will not be accepted.**

Health Department Officials offer the following vaccination recommendations:

- All cats, dogs, and ferrets three months or older must have a current rabies vaccination, even if they stay indoors.
- Dogs and cats must receive a rabies vaccination at three months old, one year, and then once every three years.
- Ferrets must receive a rabies vaccination every year.

For more information on Rabies Prevention, contact the Oneida County Health Department at 315-798-5064 or log onto our web site at <https://www.ocgov.net/oneida/envhealth/MosquitoesTicksRabies>
