

Jurisdictional Class: Competitive
EEO Category: Technician
Revised: 08/26/2019

INFORMATION SECURITY ANALYST

DISTINGUISHING FEATURES OF THE CLASS: This position performs both technical and administrative work involving policy and procedure development with regard to data integrity and security. The incumbent monitors security systems and software to ensure the safekeeping and protection of data from unauthorized modification or destruction. The position also monitors, assesses, and modifies the disaster recovery program, performs network intrusion testing, application vulnerability assessment scans, and risk assessment reviews. The work is performed under the general supervision of a higher level manager. Supervision is not a function of this class. Does related work as required.

TYPICAL WORK ACTIVITIES: (Illustrative Only)

Monitors and advises on information security issues related to both systems and workflow to ensure that internal security controls are appropriate and operating as intended;
Audits and monitors both electronic and physical security of IT systems and networks;
Coordinates a response to information security incidents;
Assists in developing information security policies, procedures, standards and guidelines based on knowledge of best practices and compliance requirements;
Conducts data classification assessment and security audits and recommends remediation plans;
Keeps abreast of latest security issues;
Reviews findings of vulnerability assessments and works to address the issues;
Audits and monitors security policies for workstations and servers;
Coordinates the reporting of security issues;
Creates, manages and maintains user security awareness;
Prepares and maintains information security documentation.
