Fire Prevention
and Control

[FIREFIGHTER 2 \(01-05-0086\) - 068](#)

Description:

Designed as the last step in initial level training for interior structural firefighters and/or who will serve as team or group leaders under the general supervision of an officer. Introduces new more advanced areas that will be expanded in other training programs. A firefighter receives the training components equivalent to those found within NFPA Firefighter II Standard.

Firefighter II is based on objectives from NFPA Standard 1001, Firefighter Level II, and consists of performance criteria in: incident command implementation, building materials and collapse, special rescue, hydrant flow and operability, hose tools, foam operations, flammable liquid/gases, detection, alarm systems, fire department communications, pre-fire planning, special situations, strategy, and tactics.

Designed for: Interior structural firefighters and/or firefighters who may serve as team or group leaders

Course Length: 24 hours

Prerequisites: Firefighter I or equivalent and students must also be physically capable of wearing SCBA and possess current medical clearance for SCBA use. Students not possessing this prerequisite will not be allowed to participate for their own safety.
